Technical Design Report for ProtoDUNE

immediate

February 10, 2016

submitted on behalf of the DUNE collaboration

Executive Summary [1 page] This is the executive summary. Write me.

Contents

| 1 | \mathbf{Intr} | oduction (Flavio, Christos) [5 pages] | | |
|---|--|---|--|--|
| | 1.1 | ProtoDUNE in context of DUNE/LBNF | | |
| | 1.2 | Goals of ProtoDUNE | | |
| | | | | |
| 2 | \mathbf{Scie} | ntific and technical motivations (Thomas)[10 pages] | | |
| | 2.1 | Charged particle beam studies | | |
| | 2.2 | Evaluation of event reconstruction performance | | |
| | 2.3 | Particle interactions and cross sections | | |
| | 2.4 | Detector engineering validation | | |
| | 2.5 | Installation validation | | |
| 3 | ProtoDUNE detector overview (Flavio, Christos, Thomas)[15 pages] | | | |
| • | 3.1 | Detector Requirements | | |
| | 3.2 | Liquid argon detector properties | | |
| | 3.3 | Wire read out planes | | |
| | 3.4 | Space charge effects | | |
| | 3.5 | | | |
| | 5.5 | | | |
| 4 | Detector components (Tim, Jim)[5-7 p. per sub-system = 60 - 74 p.] | | | |
| | 4.1 | Anode Plane Assemblies | | |
| | 4.2 | Cathode Plane Assemblies | | |
| | 4.3 | Field Cage | | |
| | 4.4 | HV components | | |
| | 4.5 | Photon detection system | | |
| | 4.6 | TPC front end electronics and DAQ | | |
| | 4.7 | PDS front end electronics and DAQ | | |
| | 4.8 | Cryostat and feed-throughs | | |
| | 4.9 | Cryogenics and LAr purification system | | |
| | | Detector monitoring and slow control | | |
| | | Mechanical mounts and supports | | |
| | | Beam window | | |
| | 4.12 | Deam window | | |
| 5 | Pro | toDUNE computing and software (Tom, Amir)[15 pages] | | |
| | 5.1 | Data handling and processing system | | |
| | 5.2 | LArSoft framework | | |
| | 5.3 | Event simulation | | |
| | 5.4 | Event reconstruction algorithms and performance | | |
| 6 | Space and infrastructure requirements (Maria)[10 pages] | | | |
| _ | 6.1 | Installation space and clean room | | |
| | 6.2 | QA/QC and testing space | | |
| | 6.3 | control room | | |
| | 6.4 | Infrastructure requiremenst | | |
| | | - | | |
| | 6.5 | Cooling requirements | | |

| 7 | 7 Test beam specification | ns (Cheng-Ju, Paola)[10 pages] | 7 | | |
|---|-------------------------------|--|---|--|--|
| | 7.1 Charged particle bea | m properties | 7 | | |
| | 7.2 Beam monitoring and | d DAQ | 7 | | |
| | 7.3 Run plan | | 7 | | |
| 8 | 8 Organization, cost estimate | Organization, cost estimate and schedule (Eric, Maria)[5-10 pages] | | | |
| | | ation | 7 | | |
| | 8.2 Cost estimate | | 7 | | |
| | 8.3 ProtoDUNE and EH | N1 schedule | 7 | | |
| 9 | 9 Summary [2 pages] | | 8 | | |

- 1 Introduction (Flavio, Christos) [5 pages]
- 1.1 ProtoDUNE in context of DUNE/LBNF
- 1.2 Goals of ProtoDUNE

This is the introduction. Write me.

- 2 Scientific and technical motivations (Thomas) [10 pages]
- 2.1 Charged particle beam studies

Science description

- 2.2 Evaluation of event reconstruction performance
- 2.3 Particle interactions and cross sections
- 2.4 Detector engineering validation

engineering motivation

- 2.5 Installation validation
- 3 ProtoDUNE detector overview (Flavio, Christos, Thomas)[15 pages]
- 3.1 Detector Requirements

insert detector overview here

- 3.2 Liquid argon detector properties
- Electron drift + LAr purity etc. LAr scintillation light
- 3.3 Wire read out planes
- charge induction and collection

- 3.4 Space charge effects
- 3.5 ...
- 4 Detector components (Tim, Jim)[5-7 p. per subsystem = 60 74 p.]
- 4.1 Anode Plane Assemblies
- 4.2 Cathode Plane Assemblies
- 4.3 Field Cage
- 4.4 HV components
- 4.5 Photon detection system
- 4.6 TPC front end electronics and DAQ
- 4.7 PDS front end electronics and DAQ
- 4.8 Cryostat and feed-throughs
- 4.9 Cryogenics and LAr purification system
- 4.10 Detector monitoring and slow control
- 4.11 Mechanical mounts and supports
- 4.12 Beam window

detailed description of detcetor hardware components including DAQ

- 5 ProtoDUNE computing and software (Tom, Amir)[15 pages]
- 5.1 Data handling and processing system
- 5.2 LArSoft framework
- 5.3 Event simulation
- 5.4 Event reconstruction algorithms and performance

description of computing, data handling and on/off-line software

may also include reconstruction software description

- 6 Space and infrastructure requirements (Maria)[10 pages]
- 6.1 Installation space and clean room
- 6.2 QA/QC and testing space
- 6.3 control room
- 6.4 Infrastructure requiremenst
- 6.5 Cooling requirements

cooling water chilled air

space and infrastructutre requirements in the EHN1 area

- 7 Test beam specifications (Cheng-Ju, Paola)[10 pages]
- 7.1 Charged particle beam properties
- 7.2 Beam monitoring and DAQ
- 7.3 Run plan

beam parameters etc.

- 8 Organization, cost estimate and schedule (Eric, Maria)[5-10 pages]
- 8.1 ProtoDUNE organization

protoDUNE organization within DUNE

8.2 Cost estimate

cost of components and coordination of production, QA/QC and installation

8.3 ProtoDUNE and EHN1 schedule

schedule

9 Summary [2 pages]

This is the summary. Write me.
